

# Reskal L

Very soft an progressive deliming agent

## Specifications:

Appearance:

Fluid liquid

Colour:

Slightly colored

Ph:

2,5±0,5

Acidity:

120-130 mg KOH/g

Solubility:

Total in water

## Advised for:

- ✓ Small leathers
- ✓ Big leathers

## Process:

- ✓ Deliming

## Storage:

## Chemical composition:

Deliming agent based on inorganic salts and versatile acids.

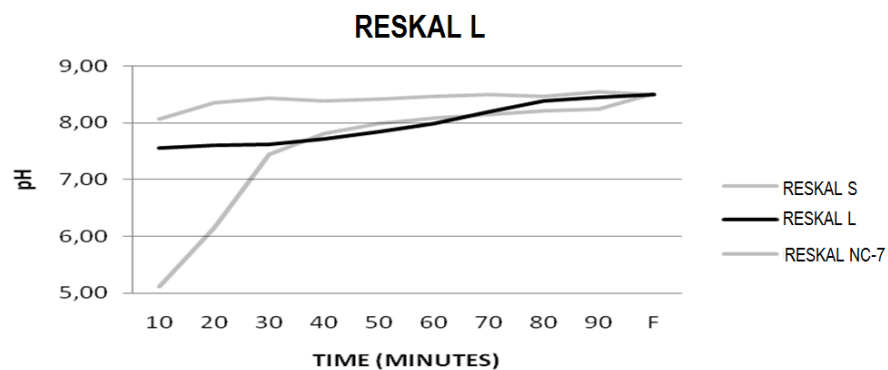

## Properties:

**Reskal L** is a deliming agent with good buffering effect due to its contents in aromatic acids.

The formed calcium salts are easily solubilised.

**Reskal L** reduces slowly leather swelling providing a very clean and very elastic grain.

It also has good solubility and an organic complexing action with chrome tanning agents.

**Reskal L** Due to its composition is compatible with leathers without splitting Deliming pH slope compared with **Reskal S** and the ammonium free **Reskal NC7**.

## Application:

**Reskal L** needs to be used at the rate of 1 to 2,5% depending on the leather type and required articles. For all kind of leathers, always use 1.5-2.5%.

Water at 30°C	150%	
<b>Reskal L</b>	0'25%	15'
Water at 36°C	60%
