

# Reskal S

Deliming agent with deep and soft effect

## Specifications:

Chemical composition:	Inorganic salts and polyfunctional organic acids
Appearance:	Solid in powder
Colour:	White
Ph:	2,5±0,3

## Properties:

It has good solubility and an organic complexion action whit the chrome tanning agents.

Provides a smooth, clean, elastic and firm grain.

Provides an excellent deliming with good buffering effect thanks to their content in aromatic acids. The formed salts of calcium are easily soluble. It has a deep action, it provides a slow swelling reduction of the pelt, giving a very clean, elastic and firm grain.

Thanks to its mild although deep effect is suitable for leathers without splitting.
